For Auzaarbazaar, the UX architecture should be designed like a B2B procurement platform + SaaS dashboard, not like a simple e-commerce site. Buyers are making ₹1L–₹50L machinery purchases, so the UX must emphasize trust, comparison, RFQs, and negotiation rather than instant checkout.
Below is a complete UX architecture for the entire marketplace.
Auzaarbazaar — Full UX Architecture
The platform has 3 core actors:
Buyers (Manufacturers)
Sellers (Machine Suppliers)
Admin / Platform
Each has its own UX flow.
1. Global Navigation Architecture
Main navigation (top website):
Copy code

Machines
Categories
Suppliers
Post RFQ
Marketplace Insights
Pricing
Login / Signup
Search bar:
Copy code

Search machines, suppliers, or categories
Search is the most important UX element.
2. Buyer UX Flow
Goal: Find machines → compare suppliers → send RFQ → negotiate → order
Step 1 — Landing Page
User arrives.
Primary actions:
Copy code

Search Machines
Browse Categories
Post RFQ
Homepage sections:
Copy code

Hero search bar
Top machine categories
Featured suppliers
Recently listed machines
Industrial insights
Step 2 — Category Discovery
Example:

Edit with WPS Office

Copy code

Metalworking Machines
Woodworking Machines
Plastic Processing Machines
Packaging Machines
CNC Machines
Grinding Machines
Each category page contains:
Copy code

Filters
Machine listings
Supplier ratings
Price range
RFQ button
Step 3 — Machine Search Results
Example search:
Copy code

CNC tool grinder
Search page layout:
Copy code

Filters sidebar
Machine listings
Sort options
Filters:
Copy code

Price range
Machine type
Location
Condition (new / used)
Brand
Power capacity
Automation level
Machine card:
Copy code

Machine image
Machine name
Supplier
Price range
Location
RFQ button

Edit with WPS Office

Save machine
4. Machine Detail Page UX
This is the most important page.
Structure:
Copy code

Machine images
Machine specifications
Supplier info
Price range
RFQ button
Tabs:
Copy code

Specifications
Supplier profile
Reviews
Documents
Similar machines
Specifications table:
Copy code

Power
Dimensions
Automation level
Country of origin
Warranty
Primary CTA:
Copy code

Send RFQ
Secondary CTA:
Copy code

Chat with supplier
5. RFQ Flow
RFQ is the core conversion event.
RFQ form:
Copy code

Machine
Budget
Quantity
Location
Delivery timeline
Message

Edit with WPS Office

Optional:
Copy code

Attach technical drawings
After submission:
Copy code

RFQ sent to suppliers
Buyer sees:
Copy code

RFQ status
Supplier responses
Quotes
6. Buyer Dashboard UX
Sections:
Copy code

Dashboard
Saved Machines
RFQs
Messages
Orders
Suppliers
Settings
Dashboard widgets:
Copy code

Active RFQs
Quotes received
Saved machines
Recommended machines
7. Quote Comparison UX
Buyers must compare suppliers easily.
Comparison table:
Copy code

Supplier
Price
Delivery time
Warranty
Rating
Actions:
Copy code

Chat

Edit with WPS Office

Request revision
Accept quote
8. Messaging UX
Built-in messaging between buyer and supplier.
Features:
Copy code

Chat
File sharing
Machine specs
Quotation documents
Video call
This replaces email chaos.
9. Order Finalization UX
Once buyer chooses supplier.
Order screen:
Copy code

Selected machine
Final quote
Delivery details
Payment terms
Possible flows:
Copy code

Direct order
Offline negotiation
Escrow payment
10. Seller UX Architecture
Goal:
Copy code

Receive RFQs
List machines
Convert leads
Seller Onboarding
Steps:
Copy code

Create account
Verify company
Add company details
Add machine listings
Verification:
Copy code

Edit with WPS Office

GST
Business address
Phone verification
11. Seller Dashboard UX
Main sections:
Copy code

Dashboard
My Listings
RFQ Leads
Orders
Messages
Analytics
Billing
Settings
Dashboard widgets:
Copy code

RFQs received
Listings views
Orders closed
Revenue generated
12. Listing Creation UX
Seller adds machine.
Form sections:
Copy code

Machine title
Category
Specifications
Price range
Images
Video
Location
Specifications can be auto-generated based on category.
13. RFQ Lead Inbox
Table view:
Copy code

Buyer
Machine
Budget
Location
Status
Actions:
Copy code

Edit with WPS Office

Send quote
Chat
Decline
14. Seller Quote Flow
Seller sends quote.
Fields:
Copy code

Machine
Price
Delivery time
Warranty
Additional notes
Optional:
Copy code

Attach quotation PDF
15. Seller Analytics UX
Analytics page shows:
Copy code

Machine views
RFQs received
Conversion rate
Revenue
Charts:
Copy code

Listings performance
Demand by region
Buyer interest
16. Supplier Profile Page
Public page.
Shows:
Copy code

Company info
Machines
Ratings
Reviews
Certifications
Trust indicators:
Copy code

Verified supplier

Edit with WPS Office

Years in business
Response rate
17. Marketplace Intelligence UX
Unique feature for Auzaarbazaar.
Insights page:
Copy code

Top machines in demand
Regional demand map
Price trends
Supplier rankings
18. Admin UX Architecture
Admin dashboard controls:
Copy code

Users
Listings
RFQs
Transactions
Moderation
Analytics
Admin tasks:
Copy code

Approve listings
Verify suppliers
Monitor RFQs
Handle disputes
19. Search UX (Very Important)
Search must support:
Copy code

machine names
machine types
brands
suppliers
Autocomplete example:
Copy code

CNC machine
CNC grinder
CNC lathe
20. Trust UX Elements
Because machines are expensive.
Important signals:
Copy code

Edit with WPS Office

Verified supplier badge
Response time
Supplier rating
RFQ success rate
21. Mobile UX
Many factory owners use phones.
Mobile priorities:
Copy code

Search
RFQ
Messages
Quotes
Mobile dashboard simplified.
22. Growth UX Features
Future features:
Copy code

AI machine recommendation
Supplier matching
Demand forecasting
Instant quotes
23. Conversion Optimization
Important UX tactics:
Copy code

RFQ urgency timers
Lead quality scores
Supplier response rankings
24. UX Funnel
The full marketplace funnel:
Copy code

Search
Browse machines
Open machine page
Send RFQ
Supplier response
Quote negotiation
Order
25. Ideal User Journey
Buyer:
Copy code

Search → Machine → RFQ → Quotes → Order

Edit with WPS Office

Seller:
Copy code

Listings → RFQs → Quotes → Orders

Edit with WPS Office
